Experience

Apr 2017 - Present

Flip Head of Product

Develop/design everything product related: from the AWS Node API, to the React/GraphQL PWA, to creating full UI/UX designs and brand marketing. Increased transactions from $0 to over $250k+/mo and assisted in raising over $6mil in funding.

Jan 2017 - Apr 2017

Facebook Frontend Engineer Intern

Utilized trained machine learning models to find top ranking posts to turn into recurring ads that adjust to reach higher impressions/clicks. Used React, Flux, Hack, GraphQL to create an interface for ad insights dashboard.

Apr 2016 - Oct 2016

Dispatch Frontend Engineer Intern

Migrated legacy meteor app using React/Redux via an open source design system that allows isolated component development. Created CLI tool to build, deploy, and run apps using Docker containers.

Apr 2015 - Sept 2015

Intuit Frontend Engineer Co-op

Used Angular, Node, and Falcor to create a microservice powered, one-click tool to create and manage AWS Jenkins deployments on the DevOps team.

Education & Recognition

Class of 2017

Northeastern University
B.S. Computer Engineering & B.S. Computer Science

GPA 3.7, Dean's List, Excellence Scholar

Forbes 30 Under 30 Scholar, Mentor/Organizer at HuskyHacks Spring/Fall 2016, Organizer/Creator of UI/UX Design Boston Meetup Fall 2016, Web dev/design teacher at Northeastern.io, Best Smart City IOT hack at SD Hacks 2015, 1st place at Fall 2014 Innoweekend, 2nd place at Spring 2015 HSC

Projects

Tinder Online
burakaslan.me/#tinder

Reverse engineered Tinder iOS app to create an Angular app. Reached 500+ daily active users.

Stream
burakaslan.me/#stream

Winning hackathon IOT project that measures water usage via iOS app.

Pokemon Yo

Social platform for Pokemon Go. Built in React, Redux, Firebase.

Cheddar
burakaslan.me/#cheddar

Anonymous messaging on iOS app for Northeastern students.

Languages

Javascript, Python, Java, GraphQL

Frameworks

React, Angular, Webpack, Babel
